EXPERIENCE

TextUs, Denver, CO — Junior Frontend Engineer

July 2021 - PRESENT

Implement new features and fix bugs for a production webapp and a Chrome Extension, primarily using JavaScript, TypeScript, React, Redux, Formik and Material-UI.

Manage dependency updates, including the intensive upgrade from Material-UI v4 to v5.

Tackle tech debt such as refactoring class components to functional components and replacing old-style implementations of Redux and Higher Order Components.

Write tests, code comments and documentation to ensure code reliability and a positive future developer experience.

Colorado Mountain Club Press, Golden, CO — Publisher

June 2019 - December 2020

Fire & Flavor, Athens, GA — Digital Marketing Director
